

Arctic Fox Near Town

- Foxes are a normal part of the ecosystem.
 - **NOT ALL FOXES ARE RABID**
 - **Signs of rabies** include stumbling, aggression towards humans, biting non-food objects, and may appear to “foam at the mouth.”
 - Please call the NSB Veterinary Clinic at **852-0277** if you witness a fox exhibiting these **abnormal** behavioral signs, or call the NSB Police at **852-6111** after hours or on weekends.
 - The lemming and vole populations have increased this year resulting in more foxes coming closer to town.
 - Please vaccinate your animals for rabies every year!
- Thank you!
